**What is this?**

This Help Guide offers some useful hints to get you started with EasyLog™ Cloud
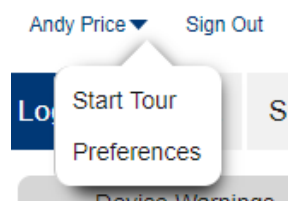

Tour

EasyLog™ Cloud features an integrated tour. This will run automatically the first time that you sign into your account. We highly recommend that you read every step, on each page, before closing the tour.

User Controls

At the top right of every page you can sign out, access your personal account preferences, or start the integrated tour for help on the features of each of the page that you are on.

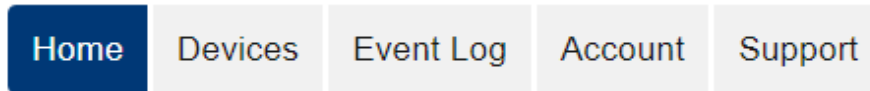

**Connecting an EL-WiFi device to your EasyLog™ Cloud account**

Click the link below and watch *'Getting Started – Connecting a WiFi Data Logger to the EasyLog Cloud.'*
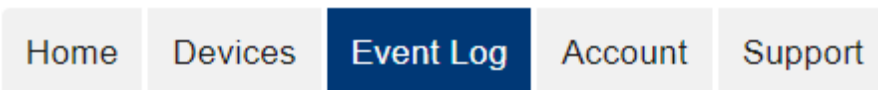

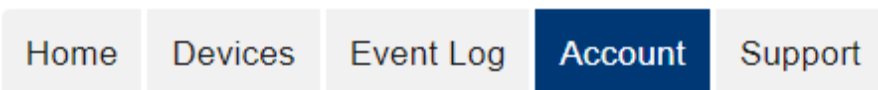

Connecting an EL-WiFi Device

Navigation

Go to the Home page for a quick view dashboard showing key device information such as alarm count, device warnings, recent events. Professional accounts also give an overview of your favourite devices.

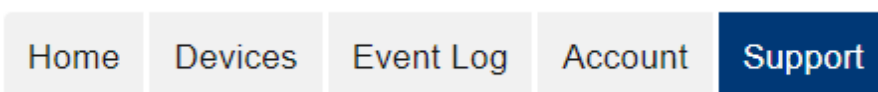

Go to the Devices page to manage your devices. See their current state and latest readings, update settings, view device data and graphs and view events related to specific devices.

Go to the Event Log page to review all events including alarms, power warnings, connection warnings and other device related events.

Go to the Account page to update account settings, location settings, user settings and personal preferences. Your access to these features depends on your account permission level.

Go to the Support section for FAQs, help guides, help videos, or if need need to contact our support team.
